

NOTES:

1. Aerial photo provided by ESRI, accessed February 2011.
2. Analytical results are from samples collected in 2010 by MACTEC.
3. The units are parts-per-trillion (ppt).
4. ND - NDMA was not detected at reporting limits ranging between 1.9 and 2.1 ppt.
5. Analytical results are presented in chronological order with the most-recent samples listed at the top.
6. "J" indicates this value was estimated by the analytical laboratory.

Approximate Limit of Groundwater Impacts based on NDMA distribution as shown in Figure 4.3-28 of the Draft Focused Remedial Investigation Report Dated October, 2007.

Approximate Limit of DAPL Pools (which are known to contain NDMA) based on Estimated Extent of DAPL as shown on Figure 1 of the Results of Induction Logging and Multilevel Piezometer Sampling Events, Olin Chemical Superfund Site, Wilmington, MA, Dated January 11, 2011.

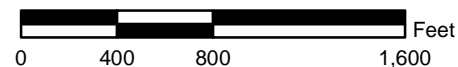

Approximate Location of Containment Area (Slurry Wall/ Temporary Cap) based on Figure 1 of the Results of Induction Logging and Multilevel Piezometer Sampling Events, Olin Chemical Superfund Site, Wilmington, MA, Dated January 11, 2011.
